

## BL67 electronic module

**4 Digital Inputs, Channel Diagnostics, 4 Digital Outputs, PNP, 0.5 A**

**BL67-4DI4DO-PD**

|                                      |   |
|--------------------------------------|---|
| Type designation                     | BL67-4DI4DO-PD  |
| Ident-No.                            | 6827203   |
| <b>Number of channels</b>            | 8   |
| Supply voltage                       | 24 VDC  |
| Nominal voltage $V_i$                | 24 VDC  |
| Nominal current from field supply    | $\leq 100 \text{ mA}$   |
| Nominal current from module bus      | $\leq 30 \text{ mA}$  |
| Max. sensor supply $I_{\text{sens}}$ | 100 mA For 2 channels (=> e.g. per M12 slot), electronically limited current supply |
| max. load current $I_o$              | 10 A via gateway or power feed  |
| Power dissipation, typical           | $\leq 1.5 \text{ W}$  |
| <b>Input type</b>                    | pnp<br>channel diagnostics  |
| Type of input diagnostics            | channel diagnostics   |
| Low level signal voltage             | < 4.5 V   |
| High level signal voltage            | 7...30 V  |
| Low level signal current             | < 1.5 mA  |
| High level signal current            | 2.1...3.7 mA  |
| Input delay                          | 0.25; 2.5 ms  |
| Electrical isolation                 | electronics for the field level   |
| Output connectivity                  | M8, M12, M23  |
| <b>Output type</b>                   | PNP   |
| Output voltage                       | 24 VDC  |
| Output current per channel           | 0.5 A   |
| Output delay                         | 3 ms  |
| Load type                            | resistive, inductive, lamp load   |
| Load resistance, resistive           | $> 48 \Omega$   |
| Load resistance, inductive           | $< 1.2 \text{ H}$   |
| Lamp load                            | $< 3 \text{ W}$   |
| Switching frequency, resistive       | $< 200 \text{ Hz}$  |
| Switching frequency, inductive       | $< 2 \text{ Hz}$  |
| Switching frequency, lamp load       | $< 20 \text{ Hz}$   |
| Electrical isolation                 | electronics for the field level   |
| <b>Number of diagnostic bits</b>     | 8   |
| Number of parameter bytes            | 4   |

### Functional principle

BL67 electronic modules are plugged into the purely passive base modules which are needed for connection of field devices. The separation of connection level and electronics simplifies maintenance considerably. Flexibility is enhanced because the user can choose between base modules with different connection technologies.

The electronic modules are completely independent of the higher level fieldbus through the use of gateways.

### Note

The inputs and outputs of the digital combi-module are supplied via a common GND. Therefore, we recommend **not** to use this module for safety or emergency stop applications.

Otherwise, it must be ensured that  $V_i$  and  $V_o$  at the gateway or power feeding module are all-pole disabled.

## BL67 electronic module

**4 Digital Inputs, Channel Diagnostics, 4 Digital Outputs, PNP, 0.5 A**

**BL67-4DI4DO-PD**

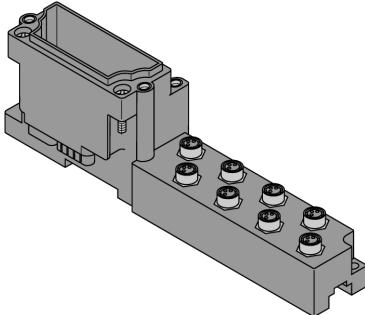

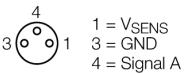

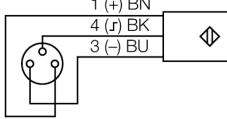

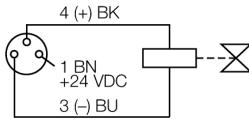

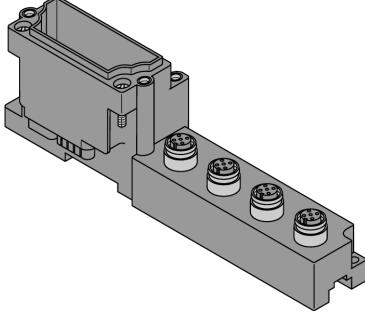

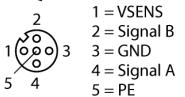

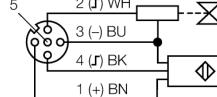

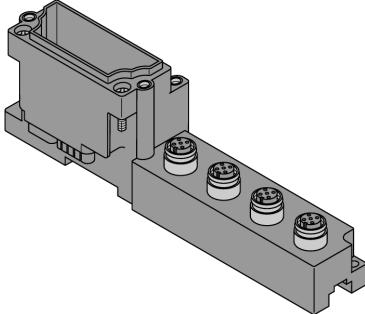

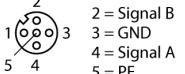

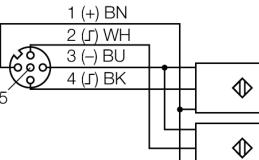

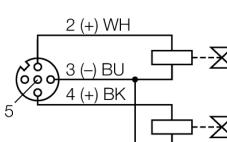

|                                   |   |
|-----------------------------------|---|
| <b>Dimensions (W x L x H)</b>     | 32 x 91 x 59mm  |
| Approvals                         | CE  |
| Operating temperature             | -40...+70 °C  |
| Temperature derating              |   |
| < 0 °C Ambient temperature        | Support for version VN 01-03 and higher, no limitation  |
| Storage temperature               | -40...+85 °C  |
| Relative humidity                 | 5 to 95 % (internal), Level RH-2, no condensation<br>(at 45 °C storage)                                       |
| Vibration test                    | acc. to EN 61131  |
| Extended vibration resistance     |   |
| - up to 5 g (at 10 to 150 Hz)     | for mounting on DIN rail no drilling according to EN 60715, with end bracket                                  |
| - up to 20 g (at 10 up to 150 Hz) | for mounting on base plate or machinery Therefore every second module has to be mounted with two screws each. |
| Shock test                        | acc. to IEC 68-2-27   |
| Drop and topple                   | acc. to IEC 68-2-31 and free fall to IEC 68-2-32  |
| Electromagnetic compatibility     | acc. to EN 61131-2  |
| Protection class                  | IP67  |
| Tightening torque fixing screw    | 0.9...1.2 Nm  |

**BL67-4DI4DO-PD**

### Data mapping

| DATA          | BYTE | Bit 7 | Bit 6 | Bit 5 | Bit 4 | Bit 3 | Bit 2 | Bit 1 | Bit 0 |
|---------------|------|-------|-------|-------|-------|-------|-------|-------|-------|
| <b>Input</b>  | n    | -     | -     | -     | -     | DI 3  | DI 2  | DI 1  | DI 0  |
| <b>Output</b> | m    | -     | -     | -     | -     | DO 3  | DO 2  | DO 1  | DO 0  |

n = Offset of input data; depending on extension of station and the corresponding fieldbus.

m = Offset of output data; depending on extension of station and the corresponding fieldbus.

With PROFIBUS, PROFINET and CANopen, the I/O data of this module is localized within the process data of the whole station via the hardware configuration tool of the fieldbus master.

With DeviceNet™, EtherNet/IP™ and Modbus TCP a detailed mapping table can be created with the TURCK configuration tool I/O-ASSISTANT.

### Pin assignment at corresponding base module:

| DATA                    | BYTE | Bit 7 | Bit 6 | Bit 5 | Bit 4 | Bit 3 | Bit 2 | Bit 1 | Bit 0 |
