

THREAD LUBRICANTS

LUBG-05

LUBG-6

LUBT-2

FEATURES-SPECIFICATIONS

Applications:

Thread lubricant is to be used extensively on male and female threaded joints to prevent galling and gumming of threads. These special formulas allow a quick release of undamaged threads when parts are disassembled.

GALLING

vs.

NO GALLING

Features:

- LUBG is a general-purpose lubricant to be used in temperatures ranging from 0° to 125°F and comes in a can with brush lid
- LUBT-2 is a high-quality lubricant to be used in temperatures ranging from -40° to +500°F. It is recommended to be used on hazardous location lighting fixtures.
- LUBG-05 is packaged in a squeezable tube for convenience of carrying. It comes packaged in a blister card for displaying purposes
