

Miro 6,2 Timer Off-delay max.0,1-10 sec.

MIRO 6.2 TIMER OFF-DELAY

Relay output  
Switch-off delay: 0.1...10 s  
Screw terminals

| General data           |                                            |
|------------------------|--------------------------------------------|
| Mounting method        | DIN-rail mountable (EN 60715)              |
| Temperature range      | 0...+55 °C                                 |
| Test isolation voltage | 4 kV; safe separation (EN 60947-1)         |
| Mech./ elect. life     | 20 000 000 switching cycles/load dependent |
| Dimensions HxWxD       | 91x6.2x71 mm                               |
| Output                 |                                            |

|                                      |                      |
|--------------------------------------|----------------------|
| Output voltage                       | max. 250 V AC/DC     |
| Min. load current                    | 100 mA (12 V DC)     |
| Output rating                        | max. 1500 VA/120 W   |
| Contact material                     | Ag Sn O <sub>2</sub> |
| Energize/release/contact bounce time | 10/15/1.5 ms         |
| Switching frequency                  | max. 10 Hz           |
| Output current                       | max. 6 A             |

**Input**

|                 |                            |
|-----------------|----------------------------|
| Input voltage   | 24 V DC (+10 -15%) input A |
| Control voltage | 24 V DC (+10 -15%) input B |
| Control current | 5 mA (input B)             |
| Input current   | 20 mA (input A)            |

**Utilization category**

|       |                                                   |
|-------|---------------------------------------------------|
| AC-15 | 3 A (24/110/230 V AC)                             |
| AC-12 | 6 A (24/110/230 V AC)                             |
| DC-13 | 1 A (24 V DC); 0.2 A (110 V DC); 0.1 A (230 V DC) |

|                                        |       |
