

**MUUW ANALOG COUPLER COMPONENT**

IN: 0..10 V - OUT: 0..10 V

INPUT: 0...10 V DC  
OUTPUT: 0...10 V DC, 20 mA  
with bridge system  
Spring clamp terminals  
Input and output galvanically separated

Technical Data	
Operating voltage	24 V DC ±20%, smoothed
Operating current	50...70 mA
Frequency	max. 500 Hz
Tolerance	max. 0.5%
General data	
Mounting method	DIN-rail mountable (EN 60715)
Temperature range	0...+60 °C
Test isolation voltage	2.5 kV
Dimensions H×W×D	91×6.2×70 mm

Description	
Functional description	The Murrelektronik analog converters convert standard signal formats (0...10 V, 0...20 mA, 4...20 mA) galvanically separated into one of these signal formats. Due to an integrated current limiter the output is short-circuit and overload protected. Module
Voltage output signals	
Load	max. 25 mA
Current outputs	
Load	max. 500 $\Omega$
Product article number of manufacturer	6644205
