

Clippard

NPP Series 2-Way Miniature Pneumatic Pinch Valves

- Small, compact design
- Normally-Open or Normally-Closed styles
- Hygienic and easy to clean (replace tubes)
- Can handle whole blood and particulate matter
- Unobstructed flow path
- Each valve comes complete with 12" of selected tubing
- Wide variety of easily replaceable tubing sizes and materials available (see back)
- For optimum performance, all products are 100% tested

Clippard's **NPP Series Pneumatic Pinch Valves** are air-piloted devices designed to open or close tubes for controlling flow of liquids and gases. Other valve types have internal passages that may cause small amounts of fluid to remain in the valve. Pinch valves have no areas of dead volume where fluid can become trapped. Only the inside of the tubing has contact with the fluid.

Common industries that utilize pinch valves for the benefit of isolating fluid from a mechanical valve include: drug dispensing, laboratory equipment, wastewater, medical devices, chemical, food and beverage equipment, ceramic/glass/plastic, and solids handling.

All NPP Series pinch valves ship with 12" of high quality tubing pre-installed. Standard options include medical grade or food grade silicone tubing, or polyurethane tubing. Custom valve configurations and additional tubing options are available (consult factory).

SPECIFICATIONS

Valve Type	2-Way, Normally-Open & Normally-Closed
Medium	Air, Water, Gas & Compatible Fluids
Max. Pilot Pressure	250 psig
Tubing Pressure	See chart below
Mounting	#4-40
Temperature Range	32 to 230°F
Wetted Materials	Medical or Food Grade Silicone, or Polyurethane
RoHS Compliant

MEDICAL / LABORATORY GRADE SILICONE TUBING

Material	Platinum-cured Silicone
Durometer Hardness	50 Shore A
Tensile Strength	1,388 psi at break
Elongation at Break	815%
Modulus at 200%	299 psi
Tear Strength	263 ppi

- Suitable for a variety of medical and laboratory applications
- Excellent flexibility
- Contains no organic plasticizers, phthalates or latex additives
- No peroxide cure chlorophenyl or PCB by-products
- Exceeds USP Class VI plastic test
- Meets ISO 10993 guidelines for body contact applications
- Manufactured to principles of FDA 21 CFR 210/211 cGMPs for pharmaceutical products
- Produced in an FDA-registered (CFN-1816403) and inspected healthcare facility

SANITARY FOOD GRADE SILICONE TUBING

Material	Platinum-cured Silicone
Durometer Hardness	50 Shore A
Tensile Strength	1,450 psi at break
Elongation at Break	770%
Modulus at 200%	280 psi
Tear Strength	200 ppi

- Suitable for applications in the food and beverage industries where preservation of taste, aroma, and color are crucial
- Excellent flexibility
- Entirely non-toxic, non-hemolytic, and non-pyrogenic
- Meets USP Class VI Criteria and 3-A Sanitary Standards
- NSF 51 Standard
- FDA 21 CFR Part 177.2600 Criteria
- Complies with ISO 10993 guidelines for contact with blood (or other body fluids or tissue) for up to 30 days as listed in the FDA GP-84

POLYURETHANE TUBING

Material	Polyurethane
Durometer Hardness	85 Shore A
Static Burst Pressure	Over 500 psig at 70°F

- Abrasion and chemical resistant
- Excellent flexibility
- UV stabilized
- Resin Compliance: NSF61, meets UL94MB, USPVI

Each valve includes 12" of tubing pre-installed. Tubing is also available separately in rolls of 5' (-005) or 50' (-050). Consult the Ordering Information chart (on reverse side) for part numbers.
