

Heavy Wall Gasketed Sewer Fittings SDR 26

Injection Molded in Sizes 4" – 12"

Fabricated in Sizes 15" – 36"

With a 34.5% thicker wall than SDR 35 and high impact retention ring, Royal Building Product's PVC Heavy Wall Gasketed Sewer fittings are manufactured to last. The distinctive green gasket is also heavy duty and engineered to make assembly fast and easy. Just push the pipe in until it hits the square stop for a solid, positive seal.

SDR 26 Heavy Wall Gasketed Sewer fittings also feature distinctive green high impact gasket retention rings for easy identification in the field. The deep lead into the gasket reduces the possibility of gasket damage or rolling. In addition, the shock absorbing ring inhibits fittings from breaking under impact.

Applications

Heavy Wall Gasketed Sewer fittings can be used where extra heavy (SDR 26) is specified by your local jurisdiction. SDR 26 fittings are intended for non-pressure drainage of sewage and surface water.

Certifications

Heavy Wall Gasketed Sewer fittings are third party tested and listed by NSF to meet specifications defined in ASTM D3034 and F1336 and CSA to meet specifications defined in CSA B182.2, where applicable.

Product Spotlights
